Managed by Lyxor International Asset Management S.A.S. ("LIAM")

### Investment objectives and policies

The Fund's investment objective is to track both the upward and the downward evolution of the CAC 40 Gross Total Return Index (gross dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR) and representative of the stocks of the 40 largest companies listed on Euronext Paris, while minimising the tracking error between the Fund's performance and that of the Benchmark Index as much as possible. The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

The Euronext website ([www.euronext.com](http://www.euronext.com)) contains more detailed information about the Euronext indices.

The Fund intends to achieve its objective via direct replication, that is, by investing primarily in Benchmark Index components.

The Fund may use a sampling technique to optimize Benchmark Index replication, temporary guaranteed security transfers. Any use of these techniques is indicated at [www.lyxoretf.com](http://www.lyxoretf.com). The current composition of the securities portfolio held by the Fund is available at [www.lyxoretf.com](http://www.lyxoretf.com).

### Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
