L&G Cyber Security UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE00BYPLS672 DE ISIN: DE000A14ZT85. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "**Company**").

Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "**Manager**")

OBJECTIVES AND INVESTMENT POLICY

- The L&G Cyber Security UCITS ETF (the "**Fund**") is an exchange traded fund ("**ETF**") that aims to track the performance of the ISE Cyber Security® UCITS Index Net Total Return (the "**Index**").
- **Dealing.** Shares in this Share Class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.lgimETF.com>.
- **Index.** The Index is comprised of companies which are publically traded on various stock exchanges around the world that generate a material proportion of their revenues from the cyber security industry. The industry is deemed to be comprised of companies in the following two sub-sectors: (1) Infrastructure Providers that develop hardware and software for safeguarding internal and external access to files, websites and networks; and (2) Service Providers that provide consulting and secure cyber-based services. A company is only eligible for inclusion in the Index if it is of a sufficient size (determined by reference to the total market value of its shares) and it is sufficiently "liquid" (a measure of how actively its shares are traded on a daily basis). Within the index, the weights allocated to the Infrastructure Provider and Service Provider sub-sectors are determined by reference to the relative size of each sector (i.e. the total market value of the shares of all companies within each sub-sector). Initially, the companies are equally weighted within each subsector. However, an adjustment to the weights is made if any company falls short of a liquidity test that is applied to each company individually.
- **Replication.** The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) "information technology" companies that are not constituents of the Index that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments ("**FDIs**") (i.e. investments the prices of which are based on the companies contained in the Index and/or such other "information technology" companies).
- **Dividend Policy.** This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

RISK AND REWARD PROFILE

- The Fund is rated 6 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- As the Index includes small and medium-sized publicly traded companies, the Fund is subject to the risk that such companies may be more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies or the stock market as a whole.
- The Fund invests in technology companies whose products may face rapid obsolescence due to technological developments and frequent new product introduction. Such companies may face unpredictable changes in growth rates, competition for the services of qualified personnel and intense domestic and international competition, including competition from foreign competitors with lower production costs. Such companies are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies.
- Additionally, companies in the cyber security field may be the target of cyber attacks themselves, which, if successful, could significantly or permanently damage a company's reputation, financial condition and ability to conduct business in the future.
- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.
- Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.

CHARGES FOR THE FUND

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.
